PowerBusiness Reporting

Executive Reporting

Reports e-mailed or access via web-browser

- ? Does your organisation struggle to manually process data to produce weekly or daily reports?
- ? Wouldn't you prefer to use the time analysing the data instead?
- ? Need a tool to distribute your Service Line reports?

PowerHealth Solutions Executive Reporting is a fully automated system that manages scheduled updates for individual reports and distributes it to a subscribed list of users.

Show downloaded reports at
 offsite meetings & presentations

Receive reports
 by e-mail

Be notified
 of report
 readiness by
 SMS

Convenience Users self-subscribe and have reports automatically e-mailed or they can be notified of their availability via SMS. Users can login using the organisation intranet or a secured internet browser access from anywhere in the world.

Multi-layered detail View high level reports with charts, and selectively drilldown to more details.

Secure Full security with password access, encrypted wireless network transmissions using expiring key authentication, as well as file-level encryption.

Automated reporting Minimise data processing with scheduled automatic report generation.

Easily export data Easily export report level detail to PDF, RTF, Excel formats.
