OLAP Reporting

Optimising decisions through in-depth analysis

? Do you want an easy and ad hoc way to analyse vast amounts of business data with instant response time, and automatic row and column totals?

PowerHealth Solutions OLAP Reporting is a powerful system with a familiar Excel-like interface using drag-and-drop operations to build your report.

Simple With the familiarity of an Excel-like interface, just drag-and-drop data fields into rows and columns to build your analysis. Microsoft Excel pivot tables can also be used to easily create reports from the OLAP cubes.

In-depth analyses Perform ad hoc and sophisticated analyses to answer your organisation's business questions. Experience instant response with the power of pre-aggregated OLAP cubes.

Consistent Consistent results achievable as all data is sourced from a single version of the facts. "Favourite" reports can also be saved for later use.

Instant The report automatically displays with automatic row and column totals.

The screenshot shows a web browser window with the URL 'PH5 OLAP Reporting -- WebClient - Microsoft Internet Explorer'. The page title is 'PH5 OLAP REPORTING WEB CLIENT'. The interface includes a 'Report Layer' on the left with 'CUBES' and 'REPORTS' sections. The main area displays a data table with columns for 'AdmitYear', 'Gender', and 'AdmitMonth'. The table is filtered for 'All Admit Year' and 'All Gender'. The data is organized by month (January, February, March, April, May) and admission type (Default Code (1) (1), Elective (3) (4), Emergency (1) (2), Urgent (2) (3)). The table includes various cost metrics such as 'Episode TotalCost', 'Female (F) (2)', 'Male (M) (3)', and 'TotalCost'. A red arrow points from the 'Simple' text block to the table, and another red arrow points from the 'Instant' text block to the table.

AdmitYear	Gender	AdmitMonth	AdmissionType	2004			2005				
				Episode TotalCost	Female (F) (2)	Male (M) (3)	Episode TotalCost	Female (F) (2)	Male (M) (3)		
All Admit Year	All Gender	All Admit Month	All Admission Type	\$79,278,802	\$6,117,442	\$34,343,825	\$40,332,504	\$22,718,457	\$17,614,047	\$38,946,298	\$22,216,520
