

PowerHealth Solutions
 >>> Driving more effective healthcare

Software Solutions & Services that improve hospital efficiency

INTERNATIONAL

Market leader in Australia and New Zealand, with extensive recognition in United States, South East Asia, Middle East and United Kingdom.

MULTI-LINGUAL

Software is enabled for all languages of the world, supporting multiple languages concurrently based on user preference.

QUALITY

ISO9001:2000 Accredited

TRACK RECORD

Proven track record for completion of projects on time and within budget.

PowerHealth Solutions is a software and services company specialising in patient billing, decision support, reporting and integration solutions for hospitals and other healthcare enterprises.

HEALTHCARE BILLING

Our new-generation billing integrates to your current operational systems to fill a significant gap in international healthcare software solutions.

BUSINESS RULES

With the embedded IDIOM decision engine, definition and maintenance of billing rules and health fund contracts are now controlled by business domain experts & business analysts.

PORTABILITY & FLEXIBILITY

With support for multiple languages and use of workflow and rules engine technology, PBRC can cross national boundaries and operate in any healthcare domain.

Products and Solutions

Our Service Oriented Architecture and Web Services-compatible solutions deliver the cost-effective information technology that is essential to support efficient operation and management of a modern healthcare enterprise.

- ▶ **PowerBilling & Revenue Collection** — an enterprise-level tier-1 patient billing solution that meets international market requirements and complements Oracle ERP and other financial systems to improve efficiency and reduce the cost of healthcare billing processes.
- ▶ **PowerPerformance Management** — calculates detailed patient level costs and actual revenue reimbursement, and manages the budget creation process. It efficiently delivers access to bottom-line results to monitor and manage business goals and inform decision making.
- ▶ **PowerBusiness Reporting** — uses Unity, our health-specific data warehouse and cost effective reporting tools to transform massive volumes of operational data into meaningful business information using:
 - Digital Dashboard for monitoring KPIs with alerts
 - Crystal Reports for day/week/month/quarter Management Reporting
 - OLAP cubes for ad-hoc reporting and data analysis.

Services

Our software solutions are backed by a full range of implementation and post-implementation support services under a service-level agreement with agreed performance metrics. Customers can log support requests via the internet 24 x7 using *PowerAssist*, monitor progress and view the call history.

Business partners

We add greater value to your organisation through strategic alliances with organisations that are widely-acknowledged and internationally-recognised health industry leaders with shared values and common objectives.
