## PowerBusiness Reporting

## OLAP Reporting

Optimising decisions through in-depth analysis

? Do you want an easy and ad hoc way to analyse vast amounts of business data with instant response time, and automatic row and column totals?

PowerHealth Solutions OLAP Reporting is a powerful system with a familiar Excel-like interface using drag-and-drop operations to build your report.

**Instant** The report automatically displays with automatic row and column totals.

**Simple** With the familiarity of an Excel-like interface, just drag-and-drop data fields into rows and columns to build your analysis. Microsoft Excel pivot tables can also be used to easily create reports from the OLAP cubes.

**In-depth analyses** Perform ad hoc and sophisticated analyses to answer your organisation's business questions. Experience instant response with the power of pre-aggregated OLAP cubes.

**Consistent** Consistent results achievable as all data is sourced from a single version of the facts. "Favourite" reports can also be saved for later use.
