

## US healthcare partnership enhances hospital efficiencies

22 November 2006

Two leading companies in healthcare decision support — [PowerHealth Solutions](#) and [TriNet Healthcare Consultants](#) — are partnering to help US hospitals maximize their profits through state-of-the-art executive reporting, cost accounting, and revenue management processes.

PowerHealth Solutions Director [Mr Paul Evans](#) states, *“This partnership delivers on the promise of offering on-demand reporting to hospital executives interested in understanding their organizations from the big picture perspective and ultimately leading to details required to make insightful business decisions.*

*“Our goal is to reach out to hospitals of all sizes and to help them manage their business resources so that they can deliver patient care services that benefit the communities.*

*“Hospital executives benefit immediately from the lower cost of ownership with advanced technology while receiving long-range value with unparalleled consulting services.”*

TriNet connected with PowerHealth Solutions last year and instantly recognised PowerPerformance Management's tremendous capabilities. Since then, the company has been actively working with clients needing executive tools from PowerHealth Solutions to replace legacy or home-grown systems that are no longer efficient for the modern healthcare organization.

TriNet Vice President, Ms Anne Farmer has worked extensively with healthcare decision support systems for over 22 years.

According to Anne, *“PowerPerformance Management is a great solution because it has removed the complexities and high costs associated with typical healthcare decision support systems.*

*“The PPM system offers hospitals open and easy-to-use standard tools for all facets of executive reporting. The solutions from PowerHealth easily outperform the competition and offer the lowest total cost of ownership.”*

Anne currently serves on the Board of the [Massachusetts HFMA chapter](#) (Healthcare Financial Management Association) and has served as the chairperson for the *Decision Support and Improving Operations committee*.

Anne is the [Keynote Speaker](#) at this year's [Australian and New Zealand PPM User Conference](#) in Hunter Valley NSW.

### ***About PowerHealth Solutions***

PowerHealth Solutions is a leading international healthcare IT vendor, based in South Australia. We are ISO 9001:2000 quality accredited, and we specialise in ***performance monitoring, performance management and decision support software solutions*** for hospitals, health departments and other healthcare organisations.

Using the latest mainstream technology, PowerHealth Solutions develops high quality affordable application software that delivers a positive return on investment, regardless of organisation size.

Our software solutions are flexible and can be delivered for ***on-site implementation and operation***, as a ***web-based hosted service***, or under an ***outsourced agreement*** that brings the benefit of a low cost of entry. All our options are backed by a full range of post implementation support services under a service level agreement that defines the services to be provided, along with agreed performance metrics.
