

# PowerHealth Solutions enters UK market

16th March 2007

PowerHealth Solutions is proud to announce that it is among the 5 international healthcare IT vendors invited by the Department of Health in the United Kingdom to showcase their healthcare performance management solutions to the [NHS Foundation Trusts](#) at the [Monitor Service Line Reporting Conference](#).

[Monitor](#) is the government-established corporate body that authorises and regulates NHS Foundation Trusts in the UK.

Held on 26 March 2007, the conference themed *Service Line Reporting: Better Management, Better Performance* is being held at the [Queen Elizabeth II Conference Centre](#) in Westminster.

An Australian-based company, PowerHealth Solutions has become acknowledged for its international expertise in patient costing and healthcare performance management consulting services and application solutions. This reputation has been earned from work undertaken in a number of countries including New Zealand, the United States and most recently in the Middle East.

From this experience, PowerHealth Solutions has developed substantial knowledge about the operation of public hospital systems, and a well-deserved reputation for implementing its patient costing and performance management solutions in public hospitals.

Mr Paul Venables Director of PowerHealth Solutions said, “With Australia’s well-earned reputation as centre of excellence in management of public hospital systems, more countries are adopting its funding model and management practises to improve operation efficiency in their hospitals.

“We are using this invitation as the perfect opportunity to establish a UK company to promote our proven solutions and services to the NHS Foundation Trusts.”

## About PowerHealth Solutions

PowerHealth Solutions is a leading international healthcare IT vendor, based in South Australia. The company is proudly ISO 9001:2000 quality accredited, and specialises in **performance monitoring**, **performance management** and **decision support software solutions** for hospitals, health departments and other healthcare organisations.

Using the latest mainstream technology, PowerHealth Solutions develops high quality affordable application software that delivers a positive return on investment, regardless of organisation size.

Their software solutions are flexible and can be delivered for **on-site implementation and operation**, as a **web-based hosted service**, or under an **outsourced agreement** that brings the benefit of a low cost of entry. All options are backed by a full range of post implementation support services under a service level agreement that defines the services to be provided, along with agreed performance metrics.
